A roof repair program is a part of the NRSA plan

NEIGHBORHOOD REVITALIZATION STRATEGY AREA

Russell is on the fast track to becoming a certified Neighborhood Revitalization Strategy Area (NRSA) by the U.S. Department of Housing and Urban Development (HUD) thanks to the efforts underway for Russell's Choice Neighborhood planning process.

Once that certification is in place, the Russell neighborhood will receive several benefits including targeted Community Development Block Grant (CDBG) funds and more flexibility with how they can be used in the neighborhood. These funds will be programmed for needs prioritized through the Choice planning process, including efforts to spur economic development and improve housing. This in turn should help stimulate more investment in the neighborhood.

The NRSA plan was developed through the Choice planning process, which has provided neighborhood stakeholders, including residents, businesses,

and faith organizations, with the opportunity to learn more about each other's aspirations for Russell and how their individual interests often complement one another or can be combined to achieve greater results within the community. Momentum is definitely continuing to build toward our shared vision for Russell.

To learn more about Russell's pending NRSA certification, you can review a draft of the plan, which will be printed after April 11th. A public hearing is scheduled for May 3rd at 6:00 p.m. at Western Library, 604 S. 10th Street, 40203.

For more information about Russell's draft NRSA plan and the public hearing, go to <https://louisvilleky.gov/government/housing-community-development/public-notices-federal-plans-and-project-compliance>
